TITLE

(X6) DATE

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (see instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F0314 SS=G	<p>Supplemental sample: 8</p> <p>These deficiencies reflect state findings cited in accordance with 410 IAC 16.2.</p> <p>Quality review 7/20/11 by Suzanne Williams, RN</p> <p>Based on the comprehensive assessment of a resident, the facility must ensure that a resident who enters the facility without pressure sores does not develop pressure sores unless the individual's clinical condition demonstrates that they were unavoidable; and a resident having pressure sores receives necessary treatment and services to promote healing, prevent infection and prevent new sores from developing.</p> <p>Based on observation, interview and record review, the facility failed to ensure services were provided to prevent pressure areas for 1 of 3 residents reviewed with either a history of, or current, pressure ulcers in a sample of 17, in that a resident identified with pressure ulcers lacked pressure reducing devices. This deficient practice resulted in Resident #26 developing multiple stage 2 pressure ulcers.</p> <p>Findings include:</p> <p>During initial tour on 7/11/11 which began at 9:50 a.m. with LPN #2, LPN #2 indicated Resident #26 was dependant on staff for all needs and had a stage II area</p>			F0314	<p>It is the policy of the facility to ensure that a resident does not develop a pressure sore unless clinical condition demonstrates that it is unavoidable. Resident #26 was admitted with an unstageable pressure area and was placed on Low Air loss and Alternating pressure mattress to help prevent further breakdown. Per manufacturer recommendations the mattress can be set on weight or patient comfort. Resident #26 did not voice discomfort with the mattress setting. Upon notification that the pump was on the off position the mattress was reinflated and an investigation began. A new mattress/pump was placed on the bed. Written statements from Lpn #2, #18 and CNA #3 state the</p>		08/01/2011

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION		X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:  155143		X2) MULTIPLE CONSTRUCTION A. BUILDING 00 B. WING _____		X3) DATE SURVEY COMPLETED 07/15/2011

	<p>to the right heel.</p> <p>On 7/11/11, during the initial tour which began at 9:50 a.m., with LPN #2, an alternating pressure mattress was noted on Resident #26's bed frame. The pump attached to the mattress indicated the mattress and pump was a "Static CVC low Air loss and Alternating pressure mattress." The pump was observed to be set at 350 on firm.</p> <p>During interview of LPN #2 on 7/11/11, during the initial tour which began at 9:50 a.m., LPN #2 indicated she was responsible for keeping track of any skin problems of the residents. The LPN indicated the unit nurses were responsible for performing treatments to open areas and she, LPN #2, measures the areas one time a week. The LPN indicated each resident receives a shower or full bath at least two times a week, and the CNA providing the care is responsible for filling out a shower sheet and identifying any skin issues the resident may have. LPN #2 indicated the completed shower sheets are given to the unit nurse who is working on the day the resident receives his/her shower and/or bath. The shower sheet is then given to the DON (Director of Nursing) and then to her (LPN #2).</p> <p>On 7/12/11 at 10:30 a.m., LPN #4 and</p>				<p>the mattress was not deflated while performing care to Resident #26. In addition, during shift change at 2pm on 7/13/11 the oncoming CNA's stated the bed appeared to be inflated. The pump was inspected by the maintenance department on 7/14/11. The maintenance department determined the motor of the pump was not functioning properly and could not be repaired therefore is no longer in use. A pressure reducing cushion was replaced in the wheelchair on 7/14/11 upon discovering it had been removed. A treatment order was obtained on 7/12/11 for the pinpoint area on buttocks. Maintenance inspected all air flow mattresses on 7/14/11 all other mattress were found to be in working order and properly inflated. Nursing staff were reeducated regarding verifying the proper settings and verify the mattress is inflated prior to exiting the room. Nursing staff was also reeducated regarding use of pressure reducing cushions. The unit managers will perform rounds at least 5x/week for the next 2 weeks to verify the air flow mattress and pressure cushions are in place. Then at least 3x/week for 2 weeks then 1x/week for 1 month and then randomly thereafter. Direct care staff will be immediately reeducated if any concerns are noted during rounds. Unit Managers will</p>

	<p>CNA #3 provided care to Resident #26. The resident was observed in bed on her back and the staff repositioned the resident on her right side. An open area was noted on the resident's left buttocks. LPN #2 entered the room and observed the area on the left buttocks. The resident was then repositioned to her left side and a large red area was noted on the resident's right hip with a dark purple area in the center. LPN #2 indicated to CNA #3 to place a cushion in the resident's wheelchair, prior to getting the resident up.</p> <p>During interview of LPN #2 on 7/11/11 at 11 a.m., the LPN verified she was unaware of these areas. The LPN indicated she had checked the shower sheets from the day before concerning Resident #26, and the shower sheets did not indicate any skin issues other than the left heel.</p> <p>On 7/12/11 at 1:40 p.m. Resident #26 was observed sitting in a wheelchair. The resident was sitting on the sling type seat of the wheelchair. A cushion was lacking. At 3 p.m., and 4 p.m., the resident was observed to be in the wheelchair without a cushion. At 4 p.m., the resident was observed to be leaning toward the right with right hip resting against the metal side piece of the wheelchair.</p>				inform members of QA committee in morning meeting of any areas of concern.

A plan of care, dated 6/24/11 addressed the problem of at risk for falls secondary to decreased mobility. Approaches included, but were not limited to, bed pressure alarm, dated 6/24/11.</p> <p>On 7/15/11 at 11:30 a.m., LPN #16 was interviewed. The LPN indicated a clip alarm had been utilized on the resident at the time of the fall and the resident had removed clothing which prevented alarm from working. The LPN indicated the resident was planned to utilize a pressure pad alarm in bed, and did not know why it had not been implemented.</p> <p>3. On 7/13/11 at 3:00 p.m., Resident B was observed to be transferred from the wheelchair to bed with the Arjo Maxi-lift by CNAs #5 and #6. After positioning the resident on the sling lift, the base of the lift was opened around the resident's wheelchair and the sling attached. The resident was raised off of the wheelchair seat. The lift was pulled away from the wheelchair, and the legs of the base closed</p>

	<p>slightly. The arrow of the indicator on the mast of the lift was observed to be on the high area of the red coloring on the mast.</p> <p>Resident B's clinical record was reviewed on 7/14/11 at 4:50 p.m. The most recent MDS [Minimum Data Set] assessment, completed on 5/7/11 coded the resident as requiring extensive assistance of two for transfers. A care plan with most recent update, dated 5/11 included the approach to utilize a hoier mechanical lift with assistance of two for transfers.</p> <p>4. On 7/12/11 at 10 a.m., Resident D was observed to be transferred from the bed to the shower chair utilizing the "Arjo" mechanical lift by CNAs #11 and #12. The resident was observed to have legs extended with spasms. The resident was unable to relax to sitting position in the shower chair. The CNAs were observed not to support the resident's extended legs. As CNA #12 pulled the resident towards the back of the shower chair, the resident was observed to relax to a sitting position. The shower chair was observed not to be a reclining shower chair.</p> <p>On 7/12/11 at 10:25 a.m., Resident D was observed to be transferred from a non-reclining shower chair to wheelchair utilizing the "Arjo" mechanical lift by CNAs #11 and #12. The resident was observed to be lifted from the shower with</p>

	<p>6. On 7/14/11 at 2:40 p.m., Resident G was observed to be transferred from the geri-chair to the shower chair utilizing the "Arjo" mechanical lift by CNAs #9 and #10. The resident was lifted from the geri-chair with the base open. The base remained open while the resident was transported to the shower chair. The height of the lift was in the "red" area. The resident was transported at this height. The resident was toileted. The CNAs then lifted the resident again with the "Arjo" mechanical lift from the shower chair. The base was open and remained open as the resident was transported back to the geri-chair. The base was closed slightly going through the doorway during transport; however, the legs were not parallel.</p> <p>Review of the clinical record of Resident G on 7/15/11 at 11:30 a.m. indicated the most recent Minimum Data Set (MDS) assessment was completed 5/7/11. The assessment identified the resident as requiring extensive assistance for transfers. The CNA assignment sheet dated 7/14/11 indicated the resident was to be transferred with the "Arjo" lift.</p> <p>Review of the "Arjo Maxilift" manufacturer's guidelines on 7/14/11 at 10:20 a.m. indicated "....Transport always</p>
